DIGITAL MEDIA FORENSIC AUDIT CERTIFICATE

SOTA Deepfake Detection System • Issued: 2026-09-28 06:51:31 UTC

Target Media:	assets\test_synthetic.jpg
SHA-256 Hash:	12837a0a0fc7a9f732db0eb369fe0c9f80f555422c10c96f85479114f7f0f016
Primary Finding:	**AUTHENTIC / ORGANIC MEDIA**
Threat Severity:	**CLEAN**
Forensic Confidence:	**69.25%**

Multi-Domain Forensic Evidence Breakdown

Forensic Analysis Domain	Synthetic Anomaly Level	Evaluation Method
Spatial Deep Learning	61.4%	EfficientNet-B0 + Convolutional Saliency
Frequency Domain (FFT)	5.0%	2D-FFT + Azimuthal Radial Decay (1/f Profile)
Error Level Analysis (ELA)	5.0%	JPEG Compression Error Residual & Disparity
Face-Background Boundary	9.0%	Perimeter Blending Gradient Discontinuity

Evidentiary Observations & Anomalies

• High spatial artifact signature detected by deep convolutional backbone.

Chain of Custody Notice: This automated forensic report was generated by the SOTA Deepfake Detection Engine using deterministic spatial, spectral, and error-level mathematical analysis. Verification hash matches the uncompressed media payload at runtime.
